ARMCHAIR WITH HIGH BACK

STOP 574-2

Stop is a furniture collection featuring armchairs and sofas with soft, inviting shapes. The series is designed with a focus on comfort, accessibility, and support, making it particularly suitable for users who need extra assistance when sitting down and standing up. Stop Wing is a wingback armchair with a high, curved backrest and features a design and construction that convey stability and security. The easy-grip armrests provide additional support and contribute to excellent usability. All upholstery, including the frame, is removable, which simplifies cleaning and ensuring good hygiene.

Stop armchair is designed for comfortable social spaces and is well suited for healthcare and care environments.

The armchair is made of FSC®-certified birch and is certified with Möbelfakta. It is offered as standard in clear lacquer, white, or black, and is also available in any custom color on request.

Design: Kenneth Bergenblad

ADDED VALUE

- Inclusive and embracing furniture for environments with special functional and hygiene requirements
- Creates a sense of home in public environments
- Soft shapes
- Easy-to-grip armrests
- Reversible cushion
- Removable upholstery
- Tested for public use and meets the requirements for durability & safety, set forth in the following standard, EN 16139

ACCESSORIES

- Frame in clear lacquer, white or black (standard)

NC Nordic Care AB

- Frame in any color (special)
- Choice of fabric
- Rubber fabric/hospital fabric
- Armrest cover

REUSE

- Solid wood
- Removable upholstery

FABRIC

- Removable and washable fabrics are washed according to washing instructions. These are sewn with a shrink seam, wash before use for optimal fit.
- Vacuuming with a soft nozzle is often sufficient for cleaning.
- Stains should always be removed as quickly as possible. In most cases, wiping with a damp cloth is sufficient, for more difficult stains, a pH-neutral detergent or a foam detergent for professional use can be used.
- Always use white cloths and avoid wetting a woolen fabric to a greater extent, as this risks remaining stains.
- If necessary, a foam detergent can also be used for a more thorough cleaning if this is allowed in the fabric's specification.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
