

CHAIR WITH UPHOLSTERED SEAT

# ALVA 072

Alva 072 is a stylish chair in Scandinavian design with upholstered seat. The chair was designed by Jonas Osslund, who aimed to design a classic stick chair with as few sticks as possible. The result was a chair with solid craftsmanship and good design. It has slightly folded back pins, which are shaped according to the user for maximum comfort

Alva is NC Nordic Care's first product in ash, with a tree structure that gives a living impression.

The chair is offered with a wooden seat or a fixed, upholstered seat. Alva is available in clear lacquered ash, or stained in white or black as standard.

## ADDED VALUE

- Nice and solid peg chair in ash
- Modern peg chair with a classic look
- The pegs in the back form a natural bag hook
- Any color
- Tested for public use and meets the requirements for durability & safety, set forth in the following standard, EN 16139

## ACCESSORIES

- Frame in ash
- Frame in any color
- Available in wooden (074) and fixed upholstered seat (072)

## REUSE

- Solid wood

## DIMENSIONS

Height	84 cm
Width	45 cm
Depth	54 cm
Seat height	45 cm
Seat depth	40 cm

Any color available as an option on this product.

## VIEWS

## FABRIC

- Removable and washable fabrics are washed according to washing instructions. These are sewn with a shrink seam, wash before use for optimal fit.
- Vacuuming with a soft nozzle is often sufficient for cleaning.
- Stains should always be removed as quickly as possible. In most cases, wiping with a damp cloth is sufficient, for more difficult stains, a pH-neutral detergent or a foam detergent for professional use can be used.
- Always use white cloths and avoid wetting a woolen fabric to a greater extent, as this risks remaining stains.
- If necessary, a foam detergent can also be used for a more thorough cleaning if this is allowed in the fabric's specification.

## WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
