ARMCHAIR

ALVA 174

Being discontinued

Alva series consists of four chairs, two of which have armrests. The armrests are made of metal wire, wrapped around the back spindles and attached beneath the seat. The chairs are available with either a wooden seat or an upholstered seat.

The design is characterized by a clean Scandinavian expression, with the ambition to create a classic spindle-back chair using as few spindles as possible. The result is a chair with a clear form, solid craftsmanship, and high comfort. The slightly flexible back spindles adapt to the user and provide pleasant support.

Alva is particularly well suited for cafés and restaurants.

The chair is made from solid ash. It is offered as standard in clear lacquer, white, or black, and is also available in any custom color on request.

Design: Jonas Osslund

ADDED VALUE

- Nice and solid peg chair in ash
- Modern peg chair with a classic look
- The pegs in the back form a natural bag hook
- Tested for public use and meets the requirements for durability & safety, set forth in the following standard, EN 16139

ACCESSORIES

- Frame in clear lacquer, white or black (standard)
- Frame in any color (special)
- Available in wooden (174) and fixed upholstered seat (172)
- Leather wrapping on armrests

METAL

- For regular cleaning, use a lightly moistened cloth with a mild detergent without solvents or abrasives.
- For heavily soiled surfaces, a cloth moistened with alcohol can be used.
- Disinfection can be done with alcohol if the surface is dried afterwards.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
