

FUNCTIONAL ARMCHAIR WITH CASTERS AND FOOTPLATE

FREJA 237

Freja is a versatile furniture collection featuring armchairs, sofas, and chairs in various sizes and functions, where tactile materials create a varied yet harmonious and cohesive expression.

Freja functional armchair features a back and seat designed for high comfort and stability and offers stepless adjustment for enhanced functionality, with the option of controls on both sides for improved accessibility and ease of use. Freja 237 features fully integrated casters and a footplate, providing smooth mobility and high ease of use. For optimal hygiene, the armchair features removable and washable upholstery for easy cleaning, as well as a gap between the seat and back that helps prevent dirt and bacteria from building up. Freja 237 is tested for a user weight of up to 160 kg in accordance with Möbelfakta requirements.

Freja is well suited for public environments where accessibility and comfort are important, such as care and nursing homes.

The armchair is made of FSC®-certified birch and is certified with Möbelfakta. It is offered as standard in clear lacquer, white, or black, and is also available in any custom color on request.

PLASTIC

For wiping, use a mild detergent without solvents or abrasives. Regular dish soap works well.

FABRIC

- Removable and washable fabrics are washed according to washing instructions. These are sewn with a shrink seam, wash before use for optimal fit.
- Vacuuming with a soft nozzle is often sufficient for cleaning.
- Stains should always be removed as quickly as possible. In most cases, wiping with a damp cloth is sufficient, for more difficult stains, a pH-neutral detergent or a foam detergent for professional use can be used.
- Always use white cloths and avoid wetting a woolen fabric to a greater extent, as this risks remaining stains.
- If necessary, a foam detergent can also be used for a more thorough cleaning if this is allowed in the fabric's specification.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
