FUNCTIONAL ARMCHAIR WITH CASTERS AND FOOTPLATE

JACKIE 537

Jackie is a versatile furniture family with armchairs, sofas and chairs with different functions and sizes with tactile materials that create a varied but harmonious and unified expression.

Jackie functional armchair has been developed to meet high standards of functionality and ergonomics. It features a high back with an adjustable headrest and offers stepless adjustment, along with a generous and functional seating experience with a unified design. Jackie 537 features fully integrated casters and a footplate, providing smooth mobility and high ease of use. For optimal hygiene, the armchair has removable and washable upholstery for easy cleaning, as well as a gap between the seat and back that helps prevent dirt and bacteria from building up.

Jackie is well suited for public environments where accessibility and comfort are important, such as care and nursing homes.

The armchair is made of FSC®-certified birch and is certified with Möbelfakta. It is offered as standard in clear lacquer, white, or black, and is also available in any custom color on request.

Design: Peter Andersson

MÖBELFAKTA

ADDED VALUE

- Uniform expression with multifunctions
- Customizable and generous seating
- Possibility of adjustment controls on both sides of the armchair
- Steplessly adjustable backrest for best comfort
- Offers many tactile materials
- Gap between seat and back for best hygiene
- Lockable wheels
- Footrest with magnetic lock
- Removable upholstery
- Tested for public use and meets the requirements for durability &

LEATHER

If you take care of the leather in the right way, it will become more beautiful over the years.

- Leather is heat sensitive. Therefore, direct sunlight and close contact with heating elements should be avoided.
- Vacuum the furniture to remove loose dirt and dust.
- Wipe the leather with a slightly damp cloth and a mild soapy solution can be used for cleaning.
- Water-based leather care products extend the lifespan.

PLASTIC

For wiping, use a mild detergent without solvents or abrasives. Regular dish soap works well.

FABRIC

- Removable and washable fabrics are washed according to washing instructions. These are sewn with a shrink seam, wash before use for optimal fit.
- Vacuuming with a soft nozzle is often sufficient for cleaning.
- Stains should always be removed as quickly as possible. In most cases, wiping with a damp cloth is sufficient, for more difficult stains, a pH-neutral detergent or a foam detergent for professional use can be used.
- Always use white cloths and avoid wetting a woolen fabric to a greater extent, as this risks remaining stains.
- If necessary, a foam detergent can also be used for a more thorough cleaning if this is allowed in the fabric's specification.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.

- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
