

STOOL

TWIST 024

Twist is a stackable stool that merges geometric with functional design.

Its form is inspired by the icositetragon, a 24-sided polygon that creates the illusion of a round seat, while the bevelled edges allow for stable and infinite stacking. The legs interlock, providing both security and a visual effect when stacking multiple stools, adding a visual element to the space. The stool is ideal for public environments such as schools, libraries, waiting areas, and creative workspaces.

The stool is made from solid FSC®-certified birch. It is offered as standard in clear lacquer, white, or black, and is also available in any custom colour on request.

Design: Madeleine Nelson.

DIMENSIONS

| | |
|-------------|-------|
| Height | 45 cm |
| Width | 42 cm |
| Depth | 42 cm |
| Seat height | 45 cm |

Any color available as an option on this product.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
