TABLE

KNOP 934

Knop is a stylish table series in Scandinavian design. The name "Knop" comes from the fact that the legs are joined to the table top in a unique aluminum knot. It provides an easy assembly, where the legs are screwed on without tools. The table tops are available in birch or oak veneer, alternatively in laminate in the colors white, birch and oak.

The Knop 934 table is offered in several sizes. It has a minimal frame, which makes it easier when choosing an armchair. In the standard version, Knop can be ordered with a table top in Quietboard with a laminate top, which provides a quieter environment.

The entire series is labeled with Möbelfakta.

Knop är ritad av Karlsson & Björk.

ADDED VALUE

- Stylish design and easy assembly
- Minimal frame
- Offered in different lengths: 100, 150, or 210 cm, width 100 cm.
- Table available in two heights: 73/75 cm
- Tested for public use and meets the requirements for durability & safety, set forth in the following standard, EN 15372

ACCESSORIES

- Ben och sarg i björk, ek eller valfri kulör
- Table top in birch or oak veneer or laminate
- Many color variants for the tabletop
- Quietboard with a laminated top
- The metal knob can be ordered in white, black or pure aluminium, as well as in any RAL color for an additional charge

REUSE

- Solid wood (leg stand)

LAMINATE

Laminates are very durable surfaces that fit well in public environments.

- Daily cleaning with a dry cloth.
- For more difficult stains, non-abrasive cleaners can be used.
- Hardly ingrained stains or discolorations can usually be removed by carefully using a cleaning agent with a mild abrasive action.
- Rings and streaks that form on the surface are most easily removed with window cleaner.
- Do not use scouring pads or steel wool as this will cause scratches.
- Marker and ink marks can be removed with e.g. acetone or alcohol on a clean cloth.
- Disinfection can be done with alcohol if the surface is dried afterwards.

METAL

- For regular cleaning, use a lightly moistened cloth with a mild detergent without solvents or abrasives.
- For heavily soiled surfaces, a cloth moistened with alcohol can be used.
- Disinfection can be done with alcohol if the surface is dried afterwards.

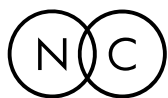

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents

must not be used.
