

STOOL

TWIST 024

Twist is a stool in solid wood, with innovative function and design. It is inspired by geometric polygons, also called polygons.

The design is based on the icosity triangle, with twenty-four sides that create the illusion of a round stool seat.

As the stools still have edges, they can be stacked endlessly, as the legs become locked together. The more stools, the taller the pillars, which in themselves become a design element in the interior.

The Twist stool is available in clear lacquer, black or white as standard.

Twist är ritad av Madeleine Nelson.

DIMENSIONS

Height	45 cm
Width	42 cm
Depth	42 cm
Seat height	45 cm

Any NCS-color available as an option on this product.

CERTIFICATIONS

VIEWS

ADDED VALUE

- Stackable
- Pillar appearance when stacked
- Easily placed
- Can also be used as a coffee table or corner table

ACCESSORIES

- Can be stained in any color

RECYCLING

- Solid wood

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
