

STORAGE

FILUREN 565

Filuren is a playful piece of furniture that was developed together with the DU & jag sofa. In the design process, great consideration has been given to inclusion, standard creativity and sustainability. The furniture in the series encourages play and activity, based on children's conditions in care environments and other public spaces. All with high demands on non-toxic and functional materials.

Filuren is suitable, for example, for waiting rooms, libraries, preschools and similar places where children stay. The furniture is a fun place to sit as well as practical storage for toys, which is of great importance in care and childcare. It is especially adapted for children aged 1 to 4 years.

It is made of birch that is labeled FSC Mix. Filuren is available in clear lacquer or black or white stain as standard.

Filuren är ritad av Jenny Fingal & Eva-Johanna Isestig.

DIMENSIONS

Height	46 cm
Width	30 cm
Depth	47 cm
Seat height	26 cm

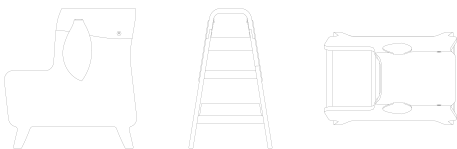

Any NCS-color available as an option on this product.

FABRIC

- Removable and washable fabrics are washed according to washing instructions. These are sewn with a shrink seam, wash before use for optimal fit.
- Vacuuming with a soft nozzle is often sufficient for cleaning.
- Stains should always be removed as quickly as possible. In most cases, wiping with a damp cloth is sufficient, for more difficult stains, a pH-neutral detergent or a foam detergent for professional use can be used.
- Always use white cloths and avoid wetting a woolen fabric to a greater extent, as this risks remaining stains.
- If necessary, a foam detergent can also be used for a more thorough cleaning if this is allowed in the fabric's specification.

WOOD

Wood is a living material whose grain from the very beginning has a natural variation in pattern, color tone and luster. The wood is affected by, among other things, the season, heat and humidity. That wood is a living material means:

- Screws need to be re-tightened regularly, at least once a year.
- Solid table tops can naturally warp by up to 0.5%.
- Light from the sun and lighting can cause permanent color and light differences in the surface, so allow the entire wooden surface to be exposed to the same amount of light.

Out of concern for the environment, we paint a large part of our range with water-based surface treatments. This means:

- Spills of coffee and other liquids need to be wiped up immediately.
- For cleaning, hand washing detergent or pH-neutral detergents and lukewarm water are recommended. Wipe off with clean water and wipe dry. Do not use cleaning agents that are alkaline, aggressive, contain abrasives or solvents.
- For disinfection, non-alcohol-based agents are recommended, e.g. Virkon or DAX Alco Free. Alcohol-based agents must not be used.
